The digital publication is hyperlinked, where possible. Here are additional specifics on those sources in addition to others consulted during the writing of this column and the larger book project from which this essay draws (tentatively titled *The Song of Styrene: An Intimate History of Plastics*, forthcoming from Scriber Books (US) and Oneworld (UK).

Acknowledgments:

My appreciation to the many who consulted with me on this project, and the larger project from which it draws, including: Hans Peter Arp, Martin Wagner, Bathsheba Demuth, Shanna Swan, Imari Walker, Carroll Muffett, Jenna Jambeck, and Alice (Xia) Zhu, Matthew Combs, Toulouse-Antonin Roy, Robert Friedel, Kathy Hipple and Judith Enck. Sophia took a rougher-than-I'd-hoped-to-deliver rough draft, smartly whittled it down, and in that, restored me to clarity so I could get to a second draft. She then deftly improved it again and again, through subsequent drafts along with her colleagues Mike and Jen. Just wanted to acknowledge the team it takes to produce a piece like this.
